ABOUT PYDATA

PyData is an educational program of NumFOCUS, a 501(c)3 non-profit organization in the United States. PyData provides a forum for the international community of users and developers of data analysis tools to share ideas and learn from each other. The global PyData network promotes discussion of best practices, new approaches, and emerging technologies for data management, processing, analytics, and visualization. PyData communities approach data science using many languages, including (but not limited to) Python, Julia, and R.

- 40% discount on additional passes

---

Gold Sponsorship
$5,000

- Logo on event website
- Sponsor acknowledgement in the welcome video
- Sponsor tweet announcement
- Job board listing
- Talk or Tutorial
- Access to opt-in participant directory
- 6 conference passes
- 30% discount on additional passes
What is included in access to the attendee list?
The list will be a .csv file with attendee name, email, job title, and company from those who have opted in during registration.

Do Sponsor Talks and Tutorials Go Through the Regular Review Process?
Sponsors are able to present a talk or tutorial at the event. While sponsor talks and tutorials do not go through the regular review process, presentation proposals must be submitted for approval by the review committee. The committee will help ensure that your presentation’s content is appropriate to the audience at the event.

What is the Job Board?
Your company’s job listings will be published on the event website and emailed out to all event attendees. Limit 5 job listings per sponsor.

What is Top Billing?
Platinum sponsors are always listed first, before any other sponsor. Platinum sponsor logos will accompany the PyData Global logo in marketing materials where feasible. Platinum sponsors are acknowledged in the title of the event as PyData Global brought to you by Your Company.
All proceeds from PyData events go to support NumFOCUS, whose mission is to promote open practices in research, data, and scientific computing. NumFOCUS accomplishes its mission by sponsoring open source software projects and organizing educational programs, events and initiatives in collaboration with the community.

**About NumFOCUS**

The mission of NumFOCUS is to promote sustainable high-level programming languages, open code development, and reproducible scientific research. We accomplish this mission through our educational programs and events as well as through fiscal sponsorship of open source scientific computing projects. We aim to increase collaboration and communication within the data science and scientific computing community.
