

PyData

Warsaw 2017

**SPONSOR PROSPECTUS**

# WHAT IS PYDATA?

PyData brings together both users and developers of data analysis tools to share ideas and learn from each other. The goals are to provide data science enthusiasts across various domains a place to discuss how best to apply languages and tools to the challenges of data management, processing, analytics, and visualization.

## COMMUNITY

PyData is organized by NumFOCUS, a 501 (c)(3) public charity working to promote and support the ongoing research and development of open-source scientific data tools through educational, community, and public channels. Proceeds from PyData help NumFOCUS to support the community through project fiscal sponsorship, Diversity in Scientific Computing initiatives, project grants, diversity and student scholarships, and the John Hunter Technology Fellowship.

## DIVERSITY

Our diversity programs have allowed us to extend over 360 scholarships, partner with organizations on outreach efforts, and hold Women in Technology workshops in conjunction with our larger PyData events. These workshops, targeted to high school girls, and made possible through NumFOCUS and the generosity of corporate sponsors, increase awareness and excitement around opportunities for women in the field of data science.

# 2016 STATS

9 Events

3500 Attendees  
331 Speakers

23 Keynotes  
74 Tutorials  
269 Talks

## EVENT LOCATIONS

Amsterdam  
Berlin  
London  
Madrid  
Paris  
Chicago  
San Francisco  
Carolinas  
DC

## ATTENDEES

@PyData -  
12.8K followers

PyData TV -  
16,000+ subscribers

meetups -  
18,000 members in 36  
meetups across the globe!

## What PyData attendees are saying...

PyData conferences offer a unique opportunity to explore our adventures at the intersection of data science and programming. As a result, they're a great way to connect with and learn from people from the community you might not encounter at other events. For instance, as a data scientist who attends a lot of data science-type meetups, I often find the core language and software engineering talks the most refreshing and enlightening!

-Rebecca B., Data Scientist

PyData NYC was a very exciting conference. It was truly inspirational to connect with such a welcoming community and to see in action the amazing tools that people are building for data scientists.

-Brian K., Data Scientist

PyData is the best place I've found to talk with other people about what they're actually doing with python.

-Dane Stuckel, Rodeo IDE Developer, Yhat (Sponsor)

# SPONSORSHIP OPPORTUNITIES

\*20% discount for temporary sponsors

	DIAMOND	PLATINUM	GOLD	SILVER	SUPPORTING

# ADDITIONAL OPTIONS AND ADD-INS

Video Sponsor (1)	Logo on opening slide frame	5000 USD
Drinks n' Data Sponsor (2)	Host the evening social event	3000 USD
Badge Sponsor (1)	Logo on attendee badges	1000 USD
Lanyard Sponsor (1)	Logo and text on lanyards	1000 USD
Job Board Listing (10)	Open positions posted on job board and website	500 USD

# MULTIPLE EVENT DISCOUNTS

Sponsor 1 event at the standard rate, get 25% off the 2nd event.

50% off all additional events!

# HOST A PYDATA EVENT

Please let us know if you are interested in sponsoring as a PyData Venue Host. Sponsors at this level generously support the community by providing a venue, as well as covering the costs of catering, A/V and wifi. Benefits at this level include all Diamond Level benefits, the option of holding a recruiting event, Platinum Level sponsorship of another PyData event, and recognition on the NumFOCUS website.
